Questions 10 of 25 points

There are 25 MCQ questions. Each of them have point value 1.

Criteria based test design requires much of a traditional CS degree. 1/1

- [x] True
- [ ] False

Suppose, while doing ISP you have identified 3 characteristics and partitioned them into (3,6,4) blocks. Now, for Each Choice Coverage(CC) there will be at least _____ test cases. 0/1

- [ ] 72
- [ ] 3
- [x] 4

??

The aim of _____ is to determine whether the software or application is accessible for disabled people or not. 1/1

- [ ] Alpha Testing
- [x] Accessibility Testing
- [ ] Compatibility Testing
- [ ] Regression Testing

Embedding test values into executable scripts is done in which MDTD activities? 0/1

- [ ] Test Execution
- [x] Test Automation
- [ ] Test Design
- [x] Test Evaluation

Suppose, while doing ISP you have identified 4 characteristics and partitioned into (2,4,4,5) blocks. Now for All Combination Coverage(ACoC) there will be at least _____ test cases. 0/1

- [x] 20
- [ ] 15
- [x] 160
- [ ] 120

ISP can be applied to _____. 1/1

- [ ] Unit
- [ ] Integration
- [ ] System
- [x] All of the above

Suppose, while doing ISP you have identified 3 characteristics and partitioned into (3,6,6) blocks. Now for Pair-Wise Choice Coverage(PWC) there will be at least _____ test cases. 0/1

- [ ] 36
- [x] 36
- [ ] 180
- [x] 42

How easy it is to provide a program with the needed inputs, in terms of values, operations, and behaviors is called _____. 0/1

- [x] Controllability
- [x] Observability
- [ ] Abstraction
- [ ] Automation

Functional describes __(1)__ the product does whereas Non Functional describes __(2)__ the product works. 1/1

- [x] (1) what, (2) how
- [ ] (1) how, (2) how
- [ ] (1) how, (2) what
- [ ] (1) what, (2) what

In the traditional Software Testing "V Model" which of the following testing is mapped with the "Subsystem Design" phase? 0/1

- [x] Acceptance Testing
- [x] Integration Testing
- [ ] Module Testing
- [ ] System Testing

_____ is to check how much load or maximum workload a system can handle without any performance degradation. 1/1

- [ ] Stress Testing
- [x] Load Testing
- [ ] Boundary Value Testing
- [ ] Performance Testing

Testing how modules interact with each other is known as _____. 0/1

- [x] System testing
- [ ] Unit testing
- [x] Module testing
- [ ] Integration testing

Both the functional and non-functional testing are easy to perform manually. 1/1

- [ ] True
- [x] False

Determining whether the completed software in fact meets the requirement is known as _____ testing. 0/1

- [ ] Module
- [x] Acceptance
- [ ] System
- [ ] Integration

The process of repeating the same test cases again and again, eventually, the same test cases will no longer find new bugs is called _____. 0/1

- [x] Early Testing
- [x] Pesticide Paradox
- [ ] Absence of Error-Fallacy
- [ ] Defect Clustering

Intra-class testing is _____. 1/1

- [ ] Test pairs of methods in the same class.
- [x] Test an entire class as sequences of calls
- [ ] Test multiple classes together.
- [ ] Test each method individually.

Consider the function: public boolean findElement (List list, Object element). Now for EDM, which of the following characteristics belong to the interface based approach? 0/1

- [x] list is empty
- [ ] element occurs first in list
- [x] number of occurrences of element in list (0, 1, >1)
- [ ] element occurs last in list

??

_____ is designed to assess individual modules in isolation, including how the component units interact with each other and their associated data structures. 0/1

- [x] Unit testing
- [ ] System testing
- [x] Module testing
- [ ] Integration testing

The objective of Happy Path Testing is _____. 1/1

- [ ] to check the robustness of the application
- [ ] to check how much load or maximum workload a system can handle without any performance degradation
- [ ] to check if an application or system gets crashed by providing random input values/data
- [x] to test an application successfully on a positive flow

Which of the following is not functional testing? 1/1

- [ ] Acceptance Testing
- [ ] Sanity Testing
- [x] Compatibility Testing
- [ ] Integration Testing

Specific things that must be satisfied or covered during testing is called _____. 0/1

- [x] Test Requirements
- [x] Test Criterion
- [ ] Test Harness
- [ ] None of the above

Which of the following is not non-functional testing? 1/1

- [ ] Performance Testing
- [ ] Recovery Testing
- [ ] Load Testing
- [x] Regression Testing

Which of the following is not part of the Input Domain? 0/1

- [ ] User Level inputs
- [ ] Parameters to a method
- [x] Counter variable of a loop.
- [x] Data read from a file

Derive tests from external descriptions of the Derive tests from the source code internals of the software, specifically including branches, individual conditions, and statements is known as _____ testing. 0/1

- [ ] Regression
- [x] White Box
- [x] Black Box
- [ ] Model-based

Suppose, while doing ISP you have identified 3 characteristics and partitioned into (4,4,7) blocks. Now for Base Choice Coverage(BCC) there will be at least _____ test cases. 0/1

- [x] 12
- [ ] 19
- [x] 12
- [ ] 16
